SUBJECT INDEX

acetylcholine turnover - effect of NGF, 239
acetylcholine - effect of NGF, 239
acetylcholine - release from striatal cells by EAAs, 107
acetylcholinesterase - effect of NGF, 239
acetylcholinesterase - interaction with lectins, 35
adenosine transport - effect of forskolin and C-AMP analog, 523
adenosine transport - in chromaffin cells, 523
adenylate activity - effect of ethanol and aging, 593
adrenal gland - catecholamine synthesis, 21
α-adrenergic receptors - in frontal cortex, 537
β-adrenoceptors - association with tumour cells, 331
aging - effect on phosphoinositide and adenylate cyclase turnover, 593
agonist effects on calcium entry, 297
amino oxidase inhibitor - 3,5-ethoxy-4-aminomethylpyridine, 215
6-aminonicotinamide - effect on dopamine, 223
amphetamine metabolites - effect on MAO-A, 587
anesthesia - mechanism, 15
anesthetics - restructure hydrogen belts in membranes, 15
angiotensin II - effect on phosphatidylinositide hydrolysis, 475
anterograde axonal transport, 487
ATP - cotransmitter with noradrenaline, 357
ATPases, 248
axonal transport - of calpain I and II, 487
B24 - 3,5-ethoxy-4-aminomethylpyridine, 215
bioflavonoids - catecholamine synthesis, 21
biogenic amines - in brain areas of old rats, 281
biogenic amines - levels in hypoxia, 281
biopterin synthesis - neurotoxin effects, 223
biopterin - in dopamine synthesis, 223
brown adipose tissue - sympathetic and sensory nerves, 271
calcitonin gene related peptide (CGRP) - in brown adipose tissue, 271
calcium activated magnesium dependent ATPase - effect of gangliosides, 609
calcium channels - and serotonin-N-acetyltransferase activity, 117
calcium entry - agonist induced, 292
calcium entry - receptor mediated, 299
calcium entry - voltage gated, 298
calcium uptake - in synaptosomes, 615
calcium - cytosolic, 615
calcium - entry into muscle cells, 297
calcium - in synaptosomes, 615
calcium - intracellular concentration, 197
calpain - anterograde axonal transport, 487
capsaicin - action on nerves innervating brown adipose tissue, 271
capsaicin - desensitization, 271
carbachol - effect on inositol phosphates, 515
carboxymethylcysteamine - displaces GABA binding, 547
carboxypeptidase H, 248
carcinoid tumour cells - in culture, 331
catecholamine metabolism - effect of neonatal enucleation, 415
catecholamine metabolism - in developing brain, 415

catecholamine synthesis, 303
catecholamine - biosynthetic activity in adrenal gland, 21
catecholamine-synthesizing enzymes, 291
ceramide-phosphoethanolamine - synthesis, 83
channels - sodium, 467
choline intermediates - in visual system and peripheral nerve, 599
chromaffin cell cultures - catecholamine synthesis, 21
chromaffin cells - adenosine transport, 523
chromaffin granules - membrane proteins, 245
chromogranins - secretory proteins, 165
corticopropin releasing factor - effect on median eminence, 605
corticotropin releasing factor - effect on gonadotropin, 605
cotransmitters - noradrenaline and ATP, 357
cytochrome b-561, 246
cytosolic calcium - effect of oxidative stress, 615
C-AMP analog - effect on adenosine transport, 523
C-AMP levels - effect of depolarizing agents and transmitters, 425
C-AMP levels - regulation in retina, 425
C-AMP turnover - effect of odorants, 553
C-AMP - regulation in retina, 425
diazepam - effect on GABA binding, 381
3,4-dihydroxyphenylacetic acid (DOPAC) content - in monkey striatum, 265
L-3,4-dihydroxyphenylalanine (DOPA) - effect of tetrahydrobiopterins on levels, 625
dopamine content - in monkey striatum, 265
dopamine release - from PC12 cells, 197
^{3}H-dopamine release - involvement of intracellular calcium, 197
dopamine synthesis - biopterin requirement, 223
dopamine synthesis - effect of 6-aminonicotinamide, 223
dopamine synthesis - in striatum, 308
dopamine synthesis - regulation, 311
dopamine - effect of MPTP, 263
dopamine - effect on phosphoinositide hydrolysis, 77
dopamine - in brain increased by milacemide, 325
dopamine-β-hydoxylase - in chromaffin granules, 246
dopamine-β-hydroxylase, 293
endocrine vesicles - membrane proteins, 245
enucleation - effect on catecholamine and serotonin metabolism, 415
ethanol - effect on phosphoinositide and adenylate turnover, 593
ethanolamine glycerophospholipid turnover - in trembler dysmyelinating mutant,573
3,5-ethoxy-4-aminomethylpyridine - amino oxidase inhibitor, 215
N-ethylmaleimide - effect on noradrenaline release, 149
excitatory amino acids - release ACh, 107
fluoxetine - effect on serotonin release, 509
forskolin - effect on adenosine transport, 523
forskolin - effect on serotonin levels, 183
free radical formation, 435
GABA binding - developmental, 381
^{3}H-GABA binding - displacement by sulfur analogues, 547
GABA binding - effect of diazepam, 381
GABA binding - effect of lead, 43
GABA binding - in developing brain, 43
GABA mechanisms - relationship with melatonin, 374
GABA - modulates release of ACh by EAAs, 107
GABA - regulates ACh release, 107
^{3}H-GABA - release, 401
^{3}H-GABA - transport, 401
GABAergic mechanism, 373
GABA-immunoreactivity - in human CNS, 101
gangliosides - effect on calcium activated magnesium dependent ATPase, 609
glia maturation factor - stimulates phosphorylation of proteins, 559
glioblasts - phosphorylation of proteins, 559
glioma cells - synthesis of sialosyl cholesterol, 93

L-glutamate decarboxylase - purification, 449
glycoprotein II, 247
glycoprotein III, 248
gonadotropin - effect of corticotropin releasing factor, 605
hippocampus synaptosomes - release of noradrenaline, 149
homothiotaurine - displaces GABA binding, 547
homovanillic acid (HVA) content - in monkey striatum, 265
hydrogen belts - effect of anesthetics, 15
p-hydroxyamphetamine - effect on MAO-A, 587
p-hydroxynorephedrine - effect on MAO-A, 587
hypoxia - biogenic amines, 281
^{3}H-idazoxan - analog for ^{3}H-RX 821002, 537
immunoaffinity - purification of L-glutamate decarboxylase, 449
inositol 1,4,5-trisphosphate - effect of carbachol, 515
inositol polyphosphate formation - effect of lithium, 515
inositol tetrakisphosphate - effect of carbachol, 515
inositol triphosphate turnover - effect of odorants, 553
isatin - in brain, 321
lateral geniculate - monoamine metabolism, 415
lead - effect of GABA binding, 43
lectins - interaction with acetylcholinesterase, 35
lithium - efect on inositol phosphate production, 515
MAO-A inhibited - by amphetamine metabolites, 587
MAO-A - in serotonergic synaptosomes, 587
MAO-B - action of milacemide, 325
median eminence - effect of corticotropin releasing factor, 605
melatonin activity, 373
melatonin - effect on GABAergic function, 374
melatonin - role, 373
membranes - effect of anesthetics, 15
metallothionein isoform - in CNS, 441
3,4-methylenedioxymethamphetamine - releases serotonin, 509
α-methylserotonin - stimulates phosphoinositide breakdown, 481
1-methyl-4-phenylpyridinium ion - see MPP^{+}
1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine - see MPTP
milacemide - increases serotonin but not dopamine, 425
milacemide - inhibitor of MAO-B, 325
^{3}H-minaprine binding - to rat brain, 67
minaprine - antidepressant agent, 67
monoamine oxidase - see MAO
MPP^{+} - and tetraphenylboron on respiration, 59
MPP^{+} - effect on mitochondrial respiration, 59
MPTP - effect on dopamine in the striatum, 263
mRNA - of zinc metallothionein II, 441
mRNA - retinal, 495
muscarinic receptors - desensitization, 9
muscarinic receptors - effect of tetrahydroaminoacridine, 457
muscarinic receptors - phosphoinositide turnover, 9
muscarinic receptors - subtypes, 457
Na^{+},K^{+} ATPase - effect of opioids, 53

neradrenaline - release, 139
nerve growth factor receptor-like immunoreactivity, 205
nerve growth factor - effect on cholinergic system, 239
nerve growth factor - receptor, 205
Nerve growth factor - see also NGF 239
nerve growth immuoreactivity - in tumour cells, 331
neuropeptide Y - effect of reserpine, 349
NMDA receptors, 1
NMDA receptors - coupling to PCP receptors, 1
noradrenaline release - effect of N-ethylmaleimide, 149
^{3}H-noradrenaline release - from synaptosomes, 149
noradrenaline release - presynaptic control, 189
noradrenaline re-uptake - mechanism, 139
noradrenaline synthesis - regulation, 312
noradrenaline - cotransmitter with ATP, 357

noradrenaline - role of vagus in release, 189
noradrenaline - uptake, 139
NRK fibroblasts, 625
N-methyl-D-aspartate, see NMDA
odorants - effect on second messenger pathways, 553
p29 protein, 252
p65 protein, 251
Parkinson syndrome, 223
PC12 cells - release of dopamine, 197
peptidyl α-amidating monoxygenase, 249
phenyclidine receptors, 1
phenycyclidine receptors - coupled to NMDA receptors, 1
phenylethanolamine-N-methyltransferase, 294
phenylethanolamine-N-methyltransferase mRNA - in adrenal glands, 343
phenylethanolamine-N-methyltransferase - influence of steroids, 343
phenyl-N-methyltransferase - effect of reserpine, 349
phosphatidic acid - formation, 27
phosphatidylethanolamine-ceremide-ethanolaminephenylphospho-
transferase - synthesis of ceramide-phosphoetholamine, 83
phosphatidylinositide hydrolysis - effect of angiotensin II, 475
phosphoinositide breakdown - effect of α-methylserotonin, 481
phosphoinositide hydrolysis - effect of dopamine, 77
phosphoinositide turnover - association with muscarinic receptors,
phosphoinositide turnover - effect of ethanol and aging, 593
phosphorylation of proteins - inhibited by taurine, 389
photoreceptors - enriched retinal cell cultures, 117
pineal - melatonin, 373
polyphosphoinositide formation - in brain, 27
poly-phosphoinositides - dehydration in brain
following decapitation, 529
poly-phosphoinositides - in brain subcellular membranes,529
potassium-evoked depolarisation - effect on
serotonin-N-acetyltransferase activity, 117
presynaptic control - of noradrenaline release, 189
presynaptic release - of serotonin, 157
quantal release - of serotonin, 157
release - of GABA, 401
reserpine - effect on neuropeptide Y, 349
reserpine - effect on phenyl-N-methyltransferase, 349
reserpine - effect on tyrosine hydroxylase, 347
retina - regulation of C-AMP, 425
retina - serotonin neurones, 177
retinal mRNA - in retinitis pigmentosa, 495
retinitis pigmentosa - retinal mRNA, 495
re-uptake - of noradrenaline, 139
^{3}H-RX 821002 - 2-methoxy analog of ^{3}H-idazoxan, 537
^{3}H-RX 821002 - binding to α_2-receptors, 537
^{3}H-saxitoxin - binding, 467
secretogranin II - chromogranins, 165
semicarbazide-sensitive amine oxidases, 215
serotonin levels - influenced by serotonin, 183
serotonin metabolism - effect of neonatal enucleation, 415
serotonin metabolism - in developing rat, 415
serotonin neurons - in the retina, 177
serotonin release - effect of fluoxetine, 509
serotonin release - effect of tryptophan, 509
serotonin release - from tumour cells, 331
serotonin release - induced by 3,4-methylenedioxymethamphetamine, 509
serotonin synaptosomes - contain MAO-A, 587
serotonin - quantal release, 157
serotonin - release, 129
serotonin - release from presynaptic terminals, 157
serotonin-N-acetyltransferase activity -
in photoreceptors of retina, 117
serotonin-N-acetyltransferase activity -
involvement of calcium channels, 117

sialosyl cholesterol - induces growth inhibition, 93
sialosyl cholesterol - synthesis in glioma cells, 93
sodium channels - in synaptic endings, 467
sodium/potassium ATPase - effect of opioids, 53
steroids - effect of phenylethanolamine-N-methyltransferase mRNA, 343
stress - effect on cytosolic calcium, 615
substance P - in brown adipose tissue, 271
SV2, 251
synapsin, 250
synaptic plasma membranes, 401
synaptic vesicles - membrane proteins, 245
synaptobrevin, 252
synaptosomal respiration - by MPP^+, 59
synaptosomes - calcium uptake and cytosolic levels, 615
synaptosomes - containing serotonin, 587
synaptosomes - formation of oxygen reactive species, 435
synaptosomes - of insects, 467
synaptosomes - releaase of noradrenaline, 149
synaptosomes - sodium channels, 467
taurine - inhibits phosphorylation of endogenous proteins, 389
tetrahydroaminoacridine - effect on muscarinic receptors, 457
tetrahydrobiopterins - effect of DOPA, 625
tetraphenylboron - and mitochondrial respiration, 59
thiotaurine - displaces GABA binding, 547
trembler dysmyelinating mutant - phospholipid turnover, 573
tryptophan - effect on serotonin release, 509
tumour cells - presence of nerve growth factor immunoreactivity, 331
tumour cells - release of serotonin, 331
tumour cells - β-adrenoceptors, 331
tyrosine hydroxylase type 2 cDNA, 625
tyrosine hydroxylase - activation, 305
tyrosine hydroxylase - effect of reserpine, 347
tyrosine hydroxylase - phosphorylation, 307
tyrosine-hydroxylase, 291
vagus - role in release of noradrenaline, 189
vesicle proteins, 251
vesicles - release and transport of GABA, 401
visual cortex - monoamine metabolism, 415
zinc metallothionein II - mRNA, 441
zinc - metallothionein II, 441
